

Course description

Manoeuvring, parking and reversing slow speed collisions are some of the most common accidents experienced by drivers. This training is designed assist with colleagues who have been involved in a slow speed manoeuvre incident whether this be during loading, parking or navigating around site. The training ensures that sufficient skills and knowledge are in place to take control of the situation and control slow speed activities in a safe manner that is understood by all involved whilst protecting the vehicle, street furniture and individuals in the immediate area.

Digital assessment reports are accessible to employers post training and provide the detail of the training and a risk rating to help employers manager their ongoing risk removing the unknown.

Who is the course for?

Vehicle operators who have been involved in a slow speed close quarter incident or who would benefit from such training.
