

Half Day/Full Day 4X4 - Winter Driving

(FM-005)

OVERVIEW

COURSE OBJECTIVES

This seasonally targeted course is designed to reinforce and enhance the knowledge of delegates for driving in severe weather and how to maximise the advantage available from 4x4/AWD vehicles if utilised correctly. It is designed to reduce risk factors and possible risks when driving in winter conditions. Drivers will also be advised about the correct vehicle and personal checks to make in the event of more severe inclement weather.

The planned purpose of the course is to equip each driver with a better understanding of the driving task during winter months, cope with each risk encountered on today's road system and be better equipped to deal with the pressures and distractions encountered with work-related driving. This course will also enable the delegate to be more informed and make improved driving decisions therefore enhancing each driver's safety margins.

WHO SHOULD ATTEND?

Any driver that uses a 4x4/AWD vehicle to familiarise and maximise the benefits from technology and controls available on the vehicle they use on company business
